How to use this checklist

1

Tick honestly

Go through each department and tick every task your team still does by hand today.

2

Count per department

Write the number of ticks next to each department and add up your total.

3

Pick your first 3

In the department with the most ticks, choose the 3 tasks that eat the most hours.

What your total means

0 – 7 ticks

Well systemised

Your basics run themselves. Look at AI agents, forecasting and connecting departments next.

8 – 16 ticks

Clear quick wins

Several daily tasks are still manual. Most are good candidates for simple Level 1–2 automation.

17 – 28 ticks

Big opportunity

Manual work is taking a large share of your team's day. Start with sales and finance, where time lost costs the most.

Sales

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Lead capture & assignment	Leads from every portal land in the CRM and are assigned instantly.	2 hrs/day → 0 min
☐ Quotation generation	AI drafts a branded quotation from the enquiry in seconds.	30 min each → 2 min
☐ Follow-up reminders	Reminders and WhatsApp nudges go out automatically, so no lead is forgotten.	Manual memory → Automatic
☐ Salesperson performance	Hot/cold, qualified and conversion reports per employee, live.	3 hrs/week → Live

Marketing

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Campaign lead reports	Meta & Google Ads leads with cost-per-lead analysis, auto-compiled.	4 hrs/week → Auto
☐ WhatsApp broadcasts	Segmented, personalised broadcasts scheduled in advance.	1 day → 15 min
☐ AI content drafts	Posts, captions and emails drafted by AI in your brand voice.	5 hrs/week → 1 hr
☐ Source-wise ROI	Know exactly which channel brings paying customers.	Guesswork → Live data

Customer Support

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ AI chatbot for FAQs	Answers product, price and policy questions 24/7.	Staff time → 24/7 bot
☐ Order status updates	Customers get dispatch & delivery updates automatically.	40 calls/day → 5 calls/day
☐ Ticket routing	Complaints are categorised and routed to the right person.	1 hr/day → 0 min
☐ Feedback & reviews	Automatic feedback requests after every order.	Rarely done → Every order

*Indicative outcomes. Actual results depend on your processes and scope.

Finance & Accounts

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Invoice generation	Invoices created from orders and emailed automatically.	10 min each → 0 min
☐ Payment reminders	Polite, escalating reminders on WhatsApp & email.	2 hrs/day → Auto
☐ Reconciliation	Bank, Tally and sales data matched by Python scripts.	2 days/month → 1 hour
☐ PDF data extraction	Purchase bills and GST invoices read by Document AI.	3 min/bill → 5 sec

HR & Admin

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Resume screening	AI shortlists candidates against your job criteria.	6 hrs/opening → 20 min
☐ Attendance & leave	Requests, approvals and records in one automated flow.	1 hr/day → 5 min
☐ Onboarding documents	Offer letters and joining kits generated from templates.	45 min → 2 min
☐ Incentive calculation	Weekly/monthly incentives computed from sales data.	1 day → Instant

Operations

Ticks _____ / 4

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Order processing	Orders from all channels flow into one system automatically.	3 hrs/day → 15 min
☐ Inventory alerts	Low-stock and dead-stock alerts before they hurt.	Stock-outs → Early alerts
☐ Dispatch updates	Tracking details sent to customers the moment goods leave.	1 hr/day → 0 min
☐ Vendor follow-ups	Automatic PO reminders and delivery confirmations.	5 hrs/week → Auto

*Indicative outcomes. Actual results depend on your processes and scope.

STILL DONE BY HAND?	WHAT AUTOMATION DOES	TYPICAL BEFORE → AFTER*
☐ Daily MIS on WhatsApp	Yesterday's numbers on your phone at 9 AM, every day.	Ask & wait → 9:00 AM daily
☐ KPI dashboard	One live screen for sales, cash, operations and team.	5 reports → 1 dashboard
☐ Forecasting	Python models forecast sales and demand.	 Gut feeling → Data model
☐ Exception alerts	Get notified only when something needs your attention.	Firefighting → Early warning

My total: _____ / 28

Department with the most ticks: _____

My first 3 automations

- 1 _____
- 2 _____
- 3 _____

The 5 levels of automation

L1 Digital Basics Stop doing the same task twice	L2 Connected Workflows Your apps talk to each other	L3 Data-Driven Live dashboards, not guesswork	L4 AI-Powered AI reads, writes and replies	L5 Autonomous The business runs itself
